

QCD matter: dense and hot

International Workshop XLIII on Gross Properties of Nuclei
and Nuclear Excitations
Darmstädter Haus, Hirschegg, Kleinwalsertal, Austria

January 17-23, 2016

Topics:

- ★ Lattice and continuum approaches to QCD thermodynamics
- ★ Probes of dense and hot matter in relativistic nuclear collisions
- ★ Dynamics of nuclear collisions: equilibration, collective motion, and freeze out
- ★ Dense matter in compact stars

Organizers:

M. Buballa (coordinator), H. Feldmeier, B. Friman, T. Galatyuk, K. Langanke, R. Roth

Program advisors:

P. Braun-Munzinger (Darmstadt), C. Greiner (Frankfurt),
F. Karsch (Bielefeld), V. Koch (Berkeley), J. Lattimer (Stony Brook)

Invited speakers:

J. Braun (Darmstadt), C. Constantinou (Jülich),
C. Fischer (Gießen), W. Florkowski (Krakow), P. Freire (Bonn),
H. van Hees (Frankfurt), A. Kalweit (Geneva),
G. Moore (Darmstadt), S. Mukherjee (Upton), M. Oertel
(Meudon), J.-Y. Ollitrault (Saclay), O. Philipsen (Frankfurt),
J. Poutanen (Turku), R. Rapp (College Station),
K. Redlich (Wroclaw), G. Roland (Cambridge, MA),
K. Schwenzer (Tübingen), J. Stroth (Frankfurt/Darmstadt),
A. Tripolt (Darmstadt), R. Venugopalan (Upton), N. Xu (Berkeley)
